Why Cant We Have Consistent Shotgun Dmg In Fornite

If shotguns were any weaker, you're going to use the fully automatic weapon that does 37-39 damage per shot in a 30 shot magazine even at close range.. Oct 26, 2010 Accuracy issues with all my rifles Is it me, the scope, handloads? I do have days at the range that I just cant hit anything.. and with no change to the firearm or load, I return the next time and put all my shots exactly where they need to be! I have a friend who is a flinching fool and we've loaded each others guns before when we've.. I use mostly green pump shotgun, it hits like 66 with a body shot up to about 15 meters, have one shot people with headshot from that distance too.
